| | Domain Registration | Domain Email | Website Updates, Edits and Maintenance | Add-ons |
|------------|----------------------------|-----------------------|---|---|
| \$5/month | \$20/year | \$40/year per address | | |
| \$10/month | \$20/year | \$40/year per address | 1 hour free/month | |
| \$15/month | Free | \$40/year per address | 2 hours free/month | |
| \$30/month | Free | Free address | 3 hours free/month | Unlimited images |
| \$50/month | Free | Free address | 6 hours free/month | Unlimited images and file attachments, 50% off all else |

Web Hosting – We manage our own server space and this allows us to provide services and easily maintain the websites we host. We can provide domain registration, email accounts, and website security. Managing services in our own space allows us to work with your files quickly and efficiently. If you choose to have us maintain your site through a different hosting service, we can still provide support at a \$50/hour rate.

Domain Registration – Domain registration is often part of any hosting package. Registering your domain with us allows us to also provide your email services and reduces complexity in managing multiple service providers. You can register your domain name with another registrar and we can still host your site, but this often causes further delay in processing some changes you want implemented to your site. Our standard domain registration fee is \$20/year, but with some hosting packages we will waive that fee.

Email Accounts – With a registered domain, you can have a single email address or you can have multiple mail boxes for that single domain. We charge \$40/year for each mailbox and that includes technical support to provide help when needed on your account. Some of our hosting packages include an email account for free.

Website Security – We can limit access to your site, or a portion of your site, to a select member base. For a one time \$100 set up fee and an additional \$5 per month to your hosting package we can put up a username and password protected secure gateway to specifically limit access to your web pages.

Web Updates and Edits – Our team offers our clients more service than almost any other hosting company. Not only will we put your site up and maintain your online presence we also offer options for continuous and increased development support for your site. Updates and edits include any and all text changes, image changes, or even redesign of existing components. These changes are usually small and many of them can be implemented quickly but they are important for keeping your site fresh and dynamic for your regular visitors. If you want more and immediate control over your content, consider a blog we can custom design for you which you can update as you please.

Add-Ons – Add-ons are components we add to your current content. These include new pages, embedded files, site widgets like calendars and guest books and additional images beyond your allotted 5 per page. Any new component that we have to add to the existing content can usually be considered an add-on. We separate these from updates and edits because these additions use more of our available server space and implementation of these items can be much more time intensive which we offset with additional fees. By adding items to your site over time, you can start with a basic inexpensive website and grow it steadily while managing the costs at a pace of your choosing.

Hosting Packages:

\$5/month – We host your site and make sure it remains as fully operational as it was upon creation. We provide no further support and any changes you want implemented to your site are at the \$50/hour rate. Domain registration with this package is \$20/year.

\$10/month – We host your site and provide one hour of free edits and updates per month. Domain registration with this package is \$20/year. This is a great package for a site owner who just need a web presence and doesn't want to make regular or large alterations to their site but need to make sure their site is current for any changes that happen in their business or life.

\$15/month – We host your site and provide two hours of free edits and updates per month. Domain registration with this package is free. This package is perfect for a site owner who wants to make regular small changes to their site to keep visitors updated on any current news or offers.

\$30/month – We host your site and provide three hours of free edits and updates per month. Domain registration with this package is free, you get a free email account, and an unlimited number of images can be added at no extra cost. This package is for those site owners who want more extensive and regular changes to their site and/or want to feature many images.

\$50/month – We host your site and provide six hours of free edits and updates per month. Domain registration with this package is free, you get a free email account, and an unlimited number of images and file attachments can be added at no extra cost. Add-ons for this package are also at 50% off. This package is designed for those who want to create a site to manage a menu of resources for their users or want to create a gallery of images and videos for their visitors to enjoy.

All websites require a hosting package, but some types, such as blogs and galleries, give more options for the site owner to make many changes themselves. Also, many types of sites make add-ons very simple to implement and in some cases would not accrue the add-on fees.

All hosting packages are purchased for a year. Payments can be made monthly or in lump sums, as you prefer.
